**WEDGEWOOD PARTNERS NAMED A “TOP GUNS” BY PSN
FOR ITS LARGE CAP EQUITY MANAGED ACCOUNTS**

*Growth manager recognized for consistent outperformance
with low volatility relative to the benchmark*

Firm acts as sub-advisor on the RiverPark/Wedgewood Mutual Fund

NEW YORK/ST. LOUIS, (DATE) – Wedgewood Partners, a leading large-cap growth equity asset management firm, was awarded 10 “Top Guns” Awards for the five-year period ending December 31, 2011 by PSN, it was announced today. Among these were “Bull & Bear Master” in the following PSN universes: U.S. Equity, U.S. Growth, Large Cap and Large Growth. In addition, Wedgewood Partners received two 5-Star Top Guns Awards in the PSN U.S. Equity and U.S. Growth universe.

PSN, a division of Informa Investment Solutions Inc., maintains the world’s longest-running and most robust manager database, containing 12,000 institutional investment products reported by more than 2,000 managers. To be considered for 5-Star “Top Guns” status, an asset manager must have demonstrated the ability to deliver superior risk-adjusted returns over time relative to the appropriate benchmark. Specifically, PSN screened for an R-squared of 0.80 or greater relative to the style benchmark over the most recent five-year period ending date, and returns greater than the benchmark for the three latest three-year rolling periods. Finally, products must have a five-year standard deviation equal to or less than the median for the peer group. The managed account products with the top ten returns for the latest three-year period then become “Top Guns”.

“The ‘Top Guns’ award criteria is designed to recognize superior risk-adjusted performance over time,” said David Rolfe, Chief Investment Officer at

Wedgewood. “As this is the basis for our firm’s investment process, we are extremely pleased to have this recognition.”

In addition to its separately managed accounts, Wedgewood acts as sub-advisor on the RiverPark/Wedgewood Fund (Ticker: RWGIX-Institutional; RWGFX-Retail), managed in a similar style by Rolfe. Launched in October 2010, the fund has grown quickly, and now has more than \$196 million in assets under management as of February 29, 2012.

R-squared is defined as a measurement of how closely a portfolio's performance correlates with the performance of a benchmark index, and thus a measurement of what portion of its performance can be explained by the performance of the overall market or index. Values for r-squared range from 0 to 1, where 0 indicates no correlation and 1 indicates perfect correlation.

Standard Deviation is defined as a statistical measurement of dispersion about an average, which depicts how widely returns varied over a certain period of time.
